SFTMA reports that approximately 160 operators called in sick this morning or about half of those
who called in sick on Tuesday. Though light rail lines and bus routes are returning to their regular
routes for the morning commute, a Muni spokesman says that riders should expect delays again
today.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Weak high pressure building in over the area will bring drier and warmer conditions through the rest of the week. Temperatures over the interior will remain above normal while the coast will continue to see low clouds most nights and mornings with temperatures closer to normal.

San Francisco Weather:

Coastal low clouds will continue across the forecast area today along with seasonably cool temperatures. A slight warming trend is expected by the weekend as high pressure builds over the eastern Pacific.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY Sacramento Weather:

High pressure over the west coast will bring fair skies and well above normal temperatures through early next week. A weak disturbance passing over the ridge will bring a slight chance of Sierra thunderstorms mainly Sunday and Monday. Temperatures should cool slightly by the middle of next week.

Hanford Weather:

A warming trend is expected in the region through the end of the week and will continue into the weekend as high pressure builds along the west coast.

WEATHER SYNOPSIS BY REGION: (Cont.)

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A broad trough of low pressure will persist over the region through the end of the week, resulting in near or slightly above normal temperatures and night through morning low clouds and fog for some areas. Gusty onshore winds can be expected for the mountains and deserts as well. Above normal temperatures are possible this weekend and early next week as a ridge of high pressure may develop.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Fair and seasonal weather will continue this coming week. Expect some coastal clouds during the nights and mornings and locally gusty winds through mountain passes during the evenings.

Southeast California Weather:

Strong high pressure centered over northern Mexico will maintain above normal temperatures into early next week. Weak weather disturbances passing through the region will lead to some fluctuations in temperatures with slight cooling late this week and slight warming early next week.

Cal EOC Incident - 2014 Drought

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

On April 25, 2014 Governor Brown released an Executive Order on Friday enabling several urgent actions to be taken as the drought persists into the state's traditional dry season.

** As this rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly over the coming months. This winter's below average rain and snowfall worsens conditions in this third straight dry year.**

Situational Summary (Cont.)

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal. A more recent update using automated devices shows snowpack at **3%** of normal as of May 30.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
